

Discover the comfort of remote control lighting.

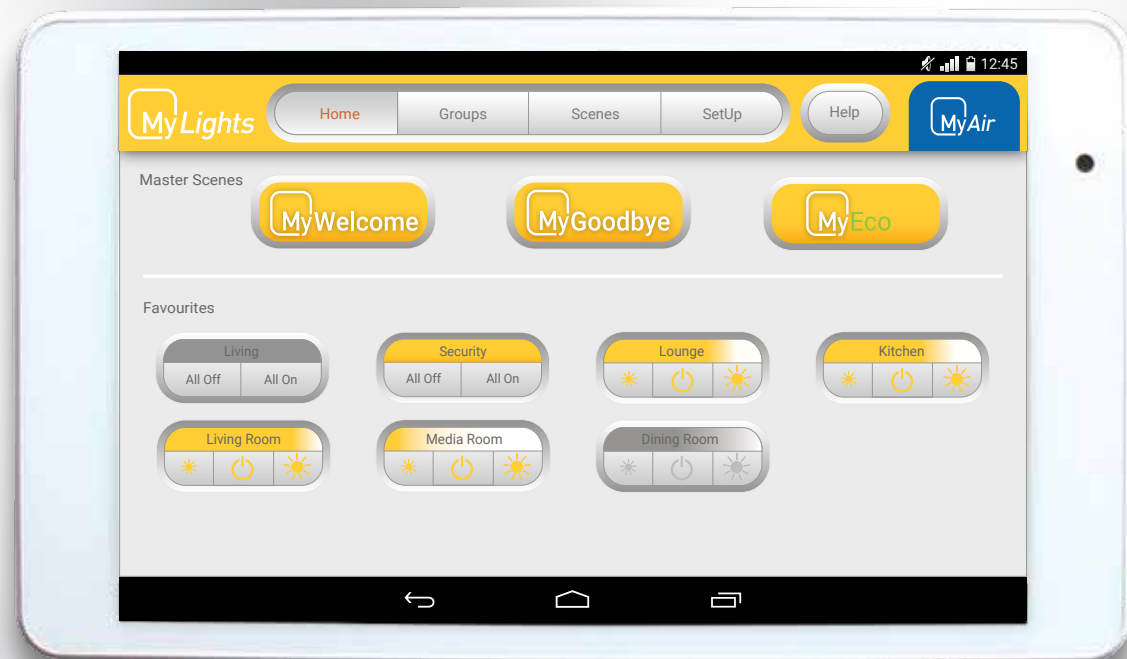

Smart LED Lighting System and Touch Screen

ADVANTAGE AIR®

MyLights. Smart lighting made easy and affordable.

Comfort is turning every light on as you pull into your driveway, or switching every light off from the warmth of your bed. Comfort is dimming the lights for a movie without leaving the couch, or making your entire house instantly light up if things go bump in the night. Comfort is knowing that with MyLights you can do all this and more, using your phone or the MyPlace touch screen.

MYPLACE WITH INTERNET

The connected home is here. MyLights comes with an 8-inch colour Android tablet that controls so much more than your lights. Check emails, order groceries, organise the family calendar, play music...all from one centrally located touch screen.

MYLIGHTS APP

Turn your mobile into a mobile light switch with Advantage Air's MyPlace App (compatible with Apple iOS7+ and Android v4.1+). Now you can control the lighting to any room, from anywhere in the world. All you need is home wifi set up and internet enabled on your phone.

OPTION TO ADD MYAIR

Make life even more comfortable by adding MyAir Series 5 air-conditioning to your home. As it's also from Advantage Air, it seamlessly integrates with MyLights and works off the MyPlace touch screen and on your phone.

ENERGY EFFICIENCY & MYECO BUTTON

Generally, LEDs (at 100% brightness) are much more energy efficient than halogen lights. To save even more energy, use the MyEco function. It automatically dims all your lights to 80% brightness - you'll barely notice the difference in the room lighting, but you'll see a big drop in your power bill.

AUSTRALIAN-MADE

Our quality components are locally designed and made to withstand harsh Australian conditions. You have the comfort of a 10-year warranty on ducting and mechanical components, and 5 years on electronics.

Control MyLights from MyPlace

The whole point of smart lighting is to make life easier, so MyLights is simple and intuitive to use – simply tap on the room you want to change the light setting of and enjoy the comfort.

As daily life migrates online, it's handy to have a dedicated touch screen for the home that the kids can't abscond with. With a touch of the Android icon, the MyPlace app switches to a tablet where you can access all your other apps and systems.

Keep track of your family's calendar, check emails, pay bills, order groceries, play music, search recipes. Always fully charged and where you need it, when you need it.

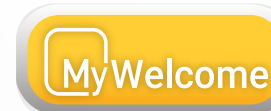

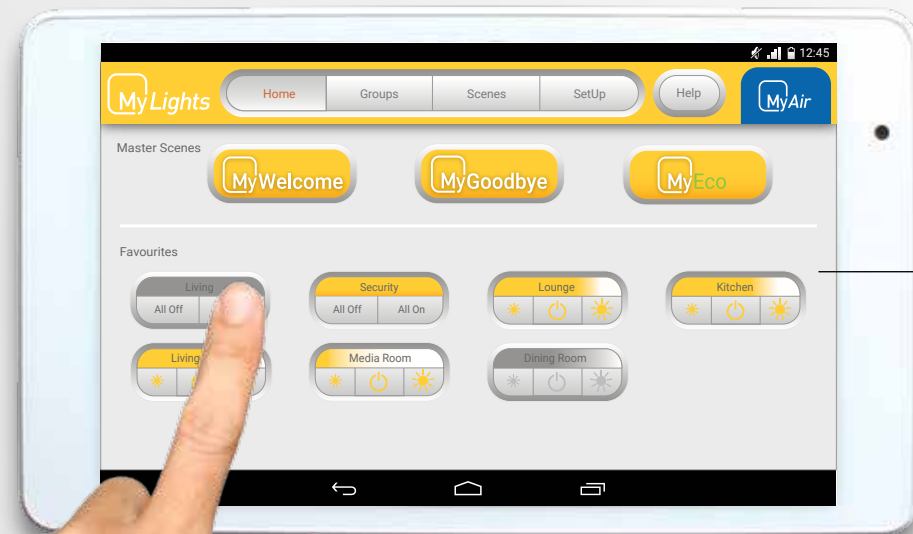

Our intuitive navigation has 4 main sections plus a tab for MyAir Series 5 if you have it installed.

HOME - These are the buttons which are most commonly used on your device. The intuitive system will automatically include them for you.

GROUPS - These are groups of lights e.g. an open plan living area could have a dining group, a kitchen and a living group or it could all be on the same group.

SCENES - These are light settings. e.g. 'Movie Night' where you have most of the living area light dimmed or 'Sleep Tight' where the children's rooms are set to night light intensity.

HELP - Simply tap the help button if assistance is required at any point in time.

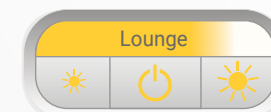

This is a general setting which turns on your selection of lights for when you first arrive home. This can be done remotely and can be edited.

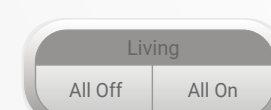

This function turns all the lights off when you leave and can be edited.

MyEco automatically dims all lights to 80% brightness. This reduces power consumption and therefore your energy bill.

To adjust the light level up, tap the large light icon, and to reduce intensity tap the small icon. The yellow bar at the top of the button displays the level.

Each group has the ability to turn all of its lights on or off together.

Your mobile light switch: the MyPlace app

Feel safe arriving home to every light on. Set the mood for a movie by dimming the lounge room lights. Make it appear like you're home, even while you're on holiday. With Advantage Air's MyPlace app you can control the lighting to any room from anywhere in the world - car, couch, cruise.... Now that's bright!

Scenes matches lighting to your mood

Changing the lighting has the power to change the mood. Dim the lights and suddenly dinner becomes cuisine; the bathroom becomes a spa; and everyone looks more attractive. With MyLights you can adjust your indoor and outdoor smart lights by area or individually, from night light level all the way up to full brightness.

Press the MyEco button and all your lights will dim to 80% brightness to save power.

Save your favourite light settings

Once you've found the perfect light setting to keep the kids' nightmares at bay, set the mood for a dinner party, or watch a movie by, save it to your scenes.

Your lighting will automatically return to that level when you run that scene.

When you use a light more often than others, it will automatically show this light on your favourites page. Now that's intuitive.

Create.

Create masterpieces in the kitchen with a bright, natural light.

Enjoy.

Enjoy a movie and still be able to see where the popcorn and remote are.

Entertain.

Entertain guests and show off your home in the best possible way.

Saying goodbye is easy

These two buttons act like a master switch: 'My Welcome' turns on all the lights you'd like to come home to; 'My Goodbye' turns off the lights when you leave. Both are customisable. Now you can arrive home safely, and get out the door faster.

See that you're safe

With MyLights you don't need to be afraid of the dark. When things go bump in the night, or you arrive home in the wee small hours, you can instantly turn on all your indoor and outdoor smart lights from your phone using the MyPlace app. With all the lights on, you'll feel safer investigating 'what was that?' or entering an empty home.

Be seen in your best light

Do you prefer a clean crisp bright light, or a warm moody glow? MyLights energy efficient LED globes come in a choice of warm, natural or cool, so you can always be seen in your best light.

The light fittings sit flush with the ceiling and come in a choice of contemporary finishes: white or brushed steel. MyLight fittings can be used inside and out, providing the outdoor area is undercover like an alfresco or portico.

Dimming your smart lights

With the ability to adjust every smart light in your home from 5 to 100% brightness without getting up, comes smart energy savings. For instance, if you dim your smart lights to 50%, you're running near zero power, which means you're saving dollars in the long run. The table below shows just how much you can save using the dimming function on the MyLights app:

Brightness	Watts of power	Cost (per year)
At 100%	10.3	\$85.41
At 90%	5.9	\$48.90
At 80%	2.7	\$22.38
At 70%	2.4	\$19.90
At 60%	1	\$8.29
At 50%	0.6	\$4.97

LED lights vs Halogen lights

Generally, LEDs (at 100% brightness) are much more efficient than halogen lights. For instance, a house with 60 lights running for 1.5 hours per day costs the following per year. LED lights give you real savings.

Halogen Lights	LED Lights
\$427.05 per year	\$85.41 per year

Is MyLights suitable for my home?

MyLights can easily be incorporated into any new home build. However if you're building a 2-storey home, it must be installed before the upstairs slab is laid. It can also be retrofitted to existing single-storey homes.

Remote Access

Remote access is available with MyAir Series 5 products, and utilises your Wifi equipped modem to operate. Your modem will require UDP and UPnP to be enabled as well as a strong wifi connection between the modem and your wall mounted touch screen panel.

Our recommended modem is the TPLink AC1200 Archer D5. You can find a list of other compatible modems that have been tested on our website.

Advantage Air endeavours to achieve compatibility with as many modems as possible, and whilst Remote Access works fine on most routers, there are some routers or applications that are not compatible. If your router is not listed and you experience issues with the operation of Remote Access, please contact your IT specialist for help with your modem settings, or alternatively try one of these modems.

- Android devices need to be running OS v4.1 or higher
- Apple devices need to be running iOS v7.0 or higher.

The connected home

Wouldn't life be even more comfortable if you could control the airflow to every room, as well as the lighting? Why not install MyAir Series 5 ducted air-conditioning at the same time? As it is from Advantage Air, it also works off the MyPlace control panel and app.

MyAir zones each room individually, so everyone can have their room at their preferred temperature – adjust the airflow to any room from 5 to 100%. Even your energy bills stay comfortable as you can run the system in only the rooms you are using.

The advantage of Australian-made

MyLights is designed by Advantage Air, an Australian company based in Perth, Western Australia. Since 1990, we've been dedicated to making peoples' lives more comfortable. We started with designing and manufacturing innovative ducted air-conditioning systems.

The connected smart home, like smart lighting, is the natural evolution of helping you create an environment where everything is exactly the way you like it.

We take pride in creating and exporting a local product that is world class. To achieve this, we embrace technology and invest heavily in research and development.

Our ingenious engineers have developed numerous industry firsts and earned us a slew of patents, registered designs and design awards in the process.

We are committed to quality and where possible, make our components in Australia. Like MyAir, your MyLights system is built to last. The only thing that shines brighter than our lights? Our service.

5-Year Warranty

Advantage Air components are well known in the industry for their quality and durability. To prove our confidence, we provide a 5-year warranty on all electronic controls.

Corporate responsibility

Advantage Air is all about bringing comfort to people. We are proud to be a sponsor of Channel 9's Matt & Kim to the rescue. The show delivers life-changing renovations to families in desperate need.
